

# 403rd Knowledge Seekers Workshop

## Key Words

October 28, 2021

*Note: Summary has not been checked by KF. Please listen to original recording and read English Transcription. (Summary by KF Brazil)*

### Quick Index:

German newspaper wrote: "Messiah sells his products," We do not imprison soul, religions frighten man from God, We are all Messiahs, New flight systems - all of us astronauts, Feeds and heals you while you fly, 10 minutes to Moon, Humans are "4 wheelers," Collectively fly units across planet same time, KS failed with MaGravs, John was feeling fields - then abandoned, Earth's gravity connected to Fe in hemoglobin, Souls from earth has "fingerprint", New EU driven by soul, No control system, We do not negotiate with governments, "3 Kings" from Persia, Need correct conduct to get in systems, STM abides by law of Mitra - have Knowledge of Universe, We govern by law of Creator, "I am the Messiah", Weapon makers - not be part of STM, We control the change, Fly with light, Light bends, Flight system has a soul, I know - race of man will change, True blood from interaction of M fields, Export STM to other parts of U, Later create spaceships through M fields, New EU creates cosmic rays, Live in space - like in womb of mother, Extend fields of soul - create a dome of life anywhere in U, Soon religious & world leaders take hats off, kingdom within knowledge, collective souls becomes the captain, Iran is birthplace of civilization Mitra - land of peace - T starts from here, Dr. Guatua to come and fly spaceship home, about Mozhan training, Emotion "I have everything I need", Man has to be thirsty for peace, Temple of T in you hearts - no temples, China's hypersonic missile - don't need to worry, Nuclear T is obsolete, Iran has new T, Iran punished for developing T beyond imagination, Need to sign World Peace Treaty, Netanyahu private bank accounts, small flight unit easy, Later massive UFOs, Live on earth visit Moon in minutes, Life creates structure like brain - soul in center, I have been teaching races for long time, We open a new era

### Key Words:

**This is the knowledge of the Creator - man will change and evolve**  
**German newspaper "this is where the Messiah sells his products." - made us laugh**  
**What we sell - people learn and develop the skills to survive in deep space**  
**We do not imprison or take STM to ransom - as in churches and everything else**  
**(Religions) that frighten the man from the knowledge of God**  
**Messengers carry both the knowledge of soul and (scientific) Knowledge - no abuse**  
**We all are Messiahs - teach knowledge - no need for temples - churches - mosques**  
**(Religions) abuse the STM - he is frightened of knowledge he is not aware of**  
**The new products we launched last week - raised questions about space T**  
**Spaceship flight systems are the beginning of the change we are bringing in**  
**The system is an Enhancement Unit (EU) with flight system added to it**

Enter space travel - organizing the whole process - travel - shipping - everything else  
The breakthrough with this T - is that every man can have access to it  
You don't need to have a specific style of life and strength - to become an astronaut  
All of us travel easily - anywhere on earth or in depth of space  
The beauty is - while flying it feeds you >>  
Takes what you don't need as an energy  
Absorbs energies from the cosmos and from the environment  
Creates a dynamic field - which allows it to give out what it doesn't need  
This integrated system will change every life.  
Officials will be present during assembly of units - to cover flight regulations  
It's not a flying car - it's a living system - travel and recover from illnesses  
Flies above 80 km - beyond reach of international laws  
This means we can place a number of these in the deep space  
Land on Moon in 10 to 20 minutes  
Our biggest problem approach - stop - landing - not flying  
From November on - take you with - in the development and assembly of the system  
We are not here to deliver a T in a package  
We work where we can change the position and direction ( of humanity)  
Long haul means - means Mars and beyond solar system  
Short haul is traveling between the cities and towns on this planet.  
A cargo system - means delivery from factory to any point of sale - in minutes  
This will change the whole structure of man's work  
(I do apologize I have something in my throat)  
Free from Wheels - human race known as "4 wheelers"  
Universal Community travels with flow of fields - not turn of wheel  
Various EU will be placed in KF Arizona  
Americans can collectively come together - fly first few units into space  
Same time fly from other locations around the world - multiple systems ready  
Not waiting for space agencies or NASA to launch  
This time let's try to collectively fly 6 of these across the planet  
Many of you tried and failed to get to the point of the MaGrav  
These systems are the most advanced version of the MaGrav  
Feeling field of MaGrav - John was on the right track  
Collective understanding of KS - not there - anxious to create electricity  
Living in the ocean - is not theory anymore  
Creates M field shielding - protects you at all times  
Inside we have created an exact copy of life on earth  
We have to keep in the integrity of the whole system, (there are) too many factors  
One is the G field forces of the earth  
Second- integrity of earth's G field in body - flow of fields of the red blood cells  
Which means - earth's gravity connected to Fe - allows hemoglobin to work  
We have to keep this integrity across the planet and the U  
This is how we know a soul is from earth - Fingerprint sits within physical body  
Focus now on integrated system - support soul - STP - feeds - psychological  
(Another) new system will be shown soon - 48 units to AZ  
New units don't have wheels

Captain - passengers - flight takes shape by thinking - no controlling systems  
 STM has intention to be somewhere - emotion between STM and STP  
 The new EU flight systems - are driven by the soul  
 Vision - Brain EU will be integrated into the flight systems  
 The new T is added into other existing systems - (we use an existing form)  
 The first systems the reactors could be seen hanging inside unit  
 VEU - so advanced T - reactors built within structure - different interactions  
 Plasma packages going around again - Gans's shown effective  
 System is protected by double and triple layers of plasmatic fields  
 Man never so well protected as in this (flight) system  
 Shortages of food and fuel - will world leaders allow to carry on  
 By placing these systems around - every citizen not feel hunger - create D of food  
 Use same structure to overcome any energy packages that may come in  
 Would the man needs the farms to survive  
 Would the man needs to kill another animal to survive.  
 We have learned to use the energies of the U (to survive)  
 This little system is a game changer - that has already come  
 The system is the first step - mankind to become part of the U Community  
 Mankind will visit other passengers of the U  
 We do not negotiate with the governments - as has been the tradition.  
 We already gave the governments a chance to walk themselves into the T  
 Now we create the systems ( and give them) - the citizens - that they can use them  
 We govern ourselves in the space - that's the way it should be  
 Keep ethos of "3 Kings" of Iran (in New testament) - man will survive in U  
 New EU is part of man's life from now on - you see it in the physical D  
 It's the KS job to start understanding the work we started long ago  
 Mankind is in different stages of development - so we still setup factories - Iran  
 For sure we will launch first flight systems across Linz - bring nations to see  
 Then it comes - how many of you would like to be the first passengers?  
 How many of you - will have a correct conduct - to be able to get in units  
 With Vision EU - you see a vision of the U - "I fly to the position"  
 Many of you were offered this Vision units - offered what we call - the soul EU  
 You were thinking of the eye of the man  
 We talk about the vision of them to see the U - (what) he likes to see  
 Where does the position of the soul sit?  
 Where would STM be - when detaches from D of physicality - that will be my home  
 Our teachings are global teachings - as global as the U. (:38).  
 Many of you fall in the traps of - the "word of the man"  
 New flight EU - collection of all the EU technologies - KF has shown up to now  
 Collective knowledge of what you have been taught is within this system.  
 You have Book 1 - 2 - 3 in this system - which way will you fly  
 Now with the thoughts you have - you decide where - to be - live - how to behave  
 Then do we need to negotiate for a few little metal scraps in any shape or form?  
 Do we need to come to an arrangement to understand what we need to do?  
 Now we see a change and evolution in science  
 We are not going to build - (because) we have already built - the systems

We might (fly) on 21st of December - for the birthday of Mitra  
That would be the gift to humanity - and we make every effort to achieve it  
None of you have realized how close you have become - all become "man of space"  
Yes - Messiah "sells" T - when the man cannot realize the knowledge given freely  
It's not a promise the change will come - the change has already come  
Officials of Iran's Sharif University worried reactor go through the ceiling  
Now we let the knowledge to go through the ceiling of the U - the T is so real  
We as KS have collectively developed the T  
It is for you to understand how the new flight EU will change your lives  
Everything you can imagine - from education to understanding work of your body  
No universities on the earth can teach the Knowledge of the U - but you receive  
If STM in truth - abides by the law of Mitra - have Knowledge of U - instantly  
Then you'll understand that every gift has been given to you  
We will bring - the "structure" of the new institute - to you as KS  
We do not negotiate with governments  
By delivering such a T - we govern through the law of the Creator  
I am the Messiah, and I will show you how  
Those who make tools of death - will not be part of the race of the STM  
It's the beginning of the change - every one of you can be a part of it  
We can control it (the change)  
We can emotionally feel it, from thousands and hundreds of kilometers away  
When system is on - felt thousand of km away  
You feel connected to it - billions of km away from man - the mother - through STM  
The reality as we said, is very real, and it sits in front of you  
Now we as a human race have become the true man of space  
"Messiah sells T" - that man doesn't become slave to a magician in space  
Those who understand will never sell their soul to another magician  
The body of these systems have started to be manufactured in China  
Next few weeks we'll be landing in the factory in Austria  
Upon its return - then we'll fly from different corners of this planet  
I wonder how many KS will want to be a part of it  
Many of you will give your life to be the first passengers  
Understand change in structure of STM - evolution of new science and T  
Travel from Beijing to Washington for a cup of tea - return 10 minutes later  
We do not travel following curvature of earth - but on the destination point  
First time man will see the light bends - fly with the light  
Means travel the speed of light within the atmospheric condition of the earth  
What we showed you as a small video has got you moving - it has started.  
Flight system has a soul - has to accept the people who get inside it  
Spaceship is a living process - linked with correct emotions of Universe  
Very quietly and incredibly we brought it to you - in the Enhancement centers  
I hope mankind will understand this knowledge  
I hope mankind will become kind to himself  
Mankind (needs) to decipher the knowledge within the system  
Maturing man to become a peaceful man - that what he has - he sees is all he needs  
Messiah accepts it - his first passenger is to travel to the Moon - next to Mars

And yes, we sell our T to the STM - and the man decides.  
My wish is to fly these systems across this planet in the next few months  
Slowly man realizes the time of burning - killing - destruction is over  
As we see more and more of these flying above us - we'll gradually change  
We enjoy the beauty of animals in the fields - not to think how they will taste  
Gradually mankind will become mature to understand.  
These systems release energies when fly - fields will change structure of planet  
The nature will grow back to way it was before man invaded  
These are not wishes - these are the facts  
I know the future that is to come - I see it in lab when I design reactors  
I know as of now - the race of the man will change - become a peaceful race  
I know with this T - when you get hungry you just walk into the system - get fed  
Ask governments to create these satellites - end hunger - diseases like cancer  
Hunger and thirst will not exist  
Man will receive energy of the water from the space of the time and place  
This is how man will live in the space  
Energy of liquid will sustain the dynamism of the M fields (of body)  
True blood comes out of interaction of M fields - which system creates - body takes  
Would long term travelers in space - still have a heart - to create emotion  
Give me another few months and many of you will understand  
I am the Messiah - as much as you are - deciding how your soul will behave  
The planet will export the STM (to rest of U) - become like a flower in its perfection  
Man's dream of becoming "Man of space" - change governments on this planet  
We will see the change in the D of the control of the fields of this planet  
As you have seen the pictures of the EU  
I am not a dreamer - we have the system - very soon you will be part of it - fly  
The children (to be) born - will be in a free world - no wrong ways  
"Messiah sells T" - to change the man - but he needs to understand  
You can become owner of one of these spaceships - go where want in U  
Collectively KS can become part of the change - through agreements with the KF  
(We want to get) these systems across this planet as fast as we can  
Later we can create spaceships through M fields - not even need materials  
In 2 or 3 years you'll understand the vision of the Creator - how man will change  
QUESTIONS:  
These systems can be set for cities to change in massive way  
Q: Will friction of fields create visible light - making spaceship glow?  
Yes - depends on interaction of fields - we'll see lights in the sky  
In lab we feel the fields in our body - and emotions they create  
Cosmic rays and other fields not known to man created by new EU  
These systems will interact with the environment in ways - not seen before  
Allow knowledge to gradually come to KS - or flies over their heads  
A lot for the scientists and society to understand - not just KS  
Story about top high paid Italian manager - but he couldn't understand T  
Manager piled MaGrav coils high on top of each other crushing Nano layers  
MaGravs did not work because N layers damaged  
He was a PhD but did not understand the knowledge

This is a problem we have with a lot of KS  
When you make a MaGrav system - watch what you are doing  
KS gradually have to understand, even what does it mean traveling in this system  
What can I do in this system.  
International law - above 80 km becomes part of space - space agencies laws  
Space (agencies) don't understand T - we created the standard  
They still want to build centers on moon - piece by piece  
With this T you just land on moon and live there like on earth  
It's exactly how you live within the womb of your mother  
From a single sperm and egg you become total human - within womb - it's the same  
You have ability to extend your own fields - create tent - live anywhere in U  
I create a field tent in Sharif University  
Thousands of square meters office block was paralyzed with this simple system.  
We increased combination of fields - created Dome of Life - anywhere in U  
Narrow-mindedness of man - makes his path narrow to walk on - only matter state  
These systems here to create initial school of thought - man can make next step.  
After a generation of understanding T - would children need a vehicle  
Messiah helps change beings from being wild - to being tame and beautiful  
When you understand interaction of fields - you can be everything you can imagine  
Nobody can sell (themselves) to you - that they are a prophet.  
I always say - I am the Messiah - but the Messiah of my own soul & physicality  
Let's see if you understand (what that means)  
Very soon world religious leaders take off their hats - walk as normal man on streets  
Man himself becomes wise to knowledge of Creator - no translator needed  
Same shall be with the kings & those who think they can keep (control) the others.  
The man will realize - "kingdom" is within structure of knowledge - not fake crown  
It's our technology - and collectively we are developing it

**Q:** You said the spaceship is controlled by thoughts. What if 2 of the 4 passengers are thinking of somewhere other than the moon. What determines where the spaceship goes?

**K-** The power of the soul which is most valued & respected - will take position  
The balance of the "discretion of the souls" will decide where you go  
The captain is "you" - the conditions of - so you cannot be abandoned in space  
Balance of souls - how you connect to system - and it connects with you  
No control systems - when you put helmet on - you become captain  
The collective balance of everyone (all the souls) - becomes the captain  
KS who have reached maturity - helping to develop system in the background

**Q:** Why are the first flights taking off from Iran?

**K-** Iran is the mother and birthplace of western civilization  
Iran is where the Mitra came from and is a land of peace and understanding  
Iran is birthplace of most living civilizations - connected in all dimensions.  
We are not restricting the flights only to Iran.  
We opened the D for flight to different countries and nations  
Gradually we deliver these units - and then we put them into flight  
Those who purchased can come and pick them up - fly them home yourself

You fly them home, - then it guarantees they work  
The different EU - are set to cover the different needs  
(Mankind will need to learn the EU) as a collective soul  
When we blow wind of knowledge to STM -every soul on planet educated (instantly)  
But not all souls are ready to go through that dimension (D)  
K- I hope you (Dr. Guatua) will be one of those who will take one.  
That's one of my deepest wishes.

Q: I look forward to bring exactly that as soon as possible.

Q: In Mozhans you taught us to use body as spaceship - fly without fear  
When we were supposed to fly - the reason why I started to rotate really fast was  
because I had fear. (1:36). I stopped all the process because of fear. The machine is  
going to give us support in the transition, learn to fly without fear. Is it like this?

K- Mozhans were taught and matured to fly with the soul  
Mozhans given full knowledge - but could not understand - greed for knowledge  
My wish was that one KS would have elevated to teach the others  
I gave the knowledge to Mozhans - through within your soul - never understood  
Soon true Mozhans - start to understand - become passengers of U  
Universal Council member & Mozhan - probably change faster

Q: During Mozhans my skin changed color  
What you said in morning - would come true at night  
Changes in body during the process happen automatically  
When things start happening, it was like death, ?? intelligence took over.  
It's not about thinking - when you think - it's not it - then things start happening  
But at the same time - we don't loss our physical, "me" or whatever  
The fear took over -because I felt something bigger was going to happen next  
It's like when someone is ready to die - is ready to let go everything  
What I understood - we are creating conditions and then the things happen  
Part of the condition is to be really ready - to have full trust - not to have fear.  
Because everything that you said - happened - without us doing anything  
You said when we are on the plane - not to connect, otherwise it will stop the plane  
You also said that 4 of us could move the position of the earth.  
They were very real - I wish I will never let you down

K- No, you haven't let anyone down - you just gradually mature  
The Mozhans have been taught what to look for  
Four chairs - Star Formation - connection to soul decide with soul of system  
This system is not a structure - this system is alive - it interacts with you  
System knows your need -gives you what you need - takes what you don't need  
No toilets - system takes everything that you don't need  
No kitchen/ dining tables -system is unified -gives what need - takes what don't need  
The man will change in these systems  
KS who became Mozhans - joined us in Ghana and China for several weeks  
We promised to bring them together again when the soul matures to be  
Those who have not understood will be weeded out.

The time for development of the soul comes step by step  
When you understand - you become the pearls of the lamps - to guide the others  
You don't become prophets  
You become the ones whose (souls) burn to let the others to see the way - the path  
A few of the KS achieved progress of the soul - some didn't  
Man is very visual - he has to see everything  
The knowledge will come back - once you learn it - it's embedded in you.  
Q: Taking advantage of space how do we achieve harmony between the crew, STM,  
STP, and the physicality. The physicality always does something on impulse?

K- Soon you will learn, that there is no such a thing, and there is no captain  
When man enters these systems - he becomes a peaceful man.  
There is no greed in the man - there is nothing - you feel peaceful - serene  
Man feels - "I have everything I want," - I don't need to work, I don't need warmth  
Passengers will feel "Emotion of Completion" - "I am complete"  
Man does not have this emotion - "I have everything I need."  
Not take food for months - the system create field balances in the body  
Do not need the machine - the cells interact with the environment  
Q: Can 2 spaceships communicate with each other - similar to submarines  
K - Of course. You interact. In the development of the T when you understand more  
Expand the fields around you - to make a shield & create an environment to sit in  
You create a similar field strength - become part of it - jump from one to other  
Q: Flying enhances the soul - is this the beginning of freedom of man? So that he  
can fly through his soul?

K- This is what I come to teach you gradually, yes, for those who are ready for it  
"You can take a horse to the water, but you can't make it drink"

Man is not thirsty for peace - he is thirsty to kill - to be something more  
Q: When will there be an exhibition or T fair in Brazil?  
K- I don't know. At the moment we are pushing with what we have in Linz  
KF is on a delicate path with world leaders - who want to keep their power  
Some leaders do not want to share T - so that everybody becomes equal  
If people understand true D of soul - walk away from religions  
Leaders don't understand - we are here to see the change through  
This time - man will walk out of this planet a peaceful man - no one can cheat him  
We are giving you the freedom of yourself  
We are not saving you to become part of a new belief - (not creating a new religion)  
If you listened to the true meaning - many should have traveled with your soul  
At the moment any place is good enough for us  
As the German newspaper article said, "The Messiah sells ..."  
We prefer to sell, than to enslave the soul  
KS have offered prestigious properties around the world - KF has refused  
If you have offer donations (freely without demands) - we accept  
If you offer things you have developed (with conditions) - we are not interested  
There shall be no temples in the path of the belief of the soul

We are not here to repeat what we have seen done wrong to man  
Those who have offered to KF - have all made terms  
I created the temple of Technology in your hearts and souls - that's all that counts  
It's you who have to keep that candle burning and make it bright - as simple as that  
The EC in Linz is for you to come and elevate your knowledge - discover what next  
When you come to Linz you will feel it - and understand  
Q: Did the government of China in any way respond to this KF flight unit, with their nuclear capable hypersonic missile, which was published widely in the last few days. Is there any coincidence there?

K- No, the Chinese didn't have much to show  
The Chinese have not reached the maturity of the T, understanding the work of it  
I told them very recently - you stole from us - you stay till you learn.  
Chinese stole a lot of T from KF - put their own name on it - they paid for it  
But the Chinese have changed - you will see  
You don't need supersonics whatever  
KF not limited to sharing Flight EU - it's our T  
Israelis are creating a huge budget against Iran - won't reach border  
It's up to the Iranian leadership to put the hand of peace out to every nation  
We gave the knowledge freely into the hands of the Iranian leadership  
Somehow- they have to understand how to use it - to change  
How Iranians can bring back the beauty of Persian Empire - peaceful kingdom  
This will come when the Iranian leadership matures and understands  
New T has made nuclear T obsolete - we gift to other nations  
(When we have new T) - what are we negotiating for  
Iranian nation is being punished for developing its T beyond imagination  
(Other nations imposing) sanctions for having knowledge  
Sanctions against knowledge.

Maybe it's time to teach the others - that they become ashamed of themselves.  
Don't worry about Chinese supersonic missiles - we can bring with flick of finger  
But that is for the Chinese to learn - it's the habit of the man  
We have to carry on with our way - irrespective of governments and nations  
KF has become a nation - sharing so openly - see how we will add to it  
I have already made a nation out of you (KS)  
You do not even know - what is about to hit the mankind  
When you have equal knowledge you already have become equal.  
We rule in a different way than the world leaders  
We rule through science - Technology - and the STM  
We teach openly at the same time.  
Q: How can we have access to units? Can Mr. Keshe lend, or offer on credit, to KS, the units at subsidized pricing?

K- Talk to us, we open the channels. Many KS have done may deals with the KF.  
We can even talk about the flights into space (bookings on KF Store)  
Make a reasonable offer to KF - we'll work with you

I hope this will bring peace to man - KS have always been the flag bearer  
 We put the price at 10 million for this system - because of a specific reason.  
 When KS travel the span of this planet and beyond. Governments have no more say  
 It means we as a race - take over - we are all equal together - we support it.  
 Talk to the KF - we are open to anything - to spread the knowledge equally across  
 Soon many KS will become travel agents for planetary and off planet travel  
 There will be new announcement in commercial world about KF  
 You will see how the KF will become one of the largest corporations in the world  
 For the EU you have to sign World Peace Treaty- through your heart and soul  
 We see how people who instigate wars - end up  
 Netanyahu made Iran to be biggest enemy - to sell arms to Saudis - personal gain  
 Netanyahu banked 20 to 30% in his private accounts - 2,000 court cases  
 KS have to be alert to how they manipulate you  
 Soon you'll understand - there is much more behind the teachings then we talk  
 No more kings or religious leaders - we become leader of our own soul  
 Q: Azar - there is a noise that comes from your microphone, like gosh, gosh sound  
 K- It is my headphone which is rubbing. ..  
 I try to concentrate on the teaching of the soul - more then anything else  
 But at times the microphones moves sometimes  
 Q: We would like to begin building a plasma feeding stations - any suggestions?  
 K- Buy a flight system - it also feeds you and everything else  
 This is more or less the beginning of the completion of the Technology  
 I introduced a flight system - so that it can be reached by every man  
 Easier then trying to build through the fields a massive space UFOs  
 Massive UFOs will be built in the coming time  
 Soon a number of these units set in formation - create massive UFO  
 Each system will take its place - and with it you create a new D  
 I showed man how to connect these units - not long to wait  
 Q: How do you see the future for human race in next 10 to 20 years?  
 K- We answered that one.  
 Won't colonize Moon - live on earth - takes trips to planets on same day  
 If you manage to understand knowledge - you'll travel span of U  
 Mankind is not the first ones - many races have already been through this process  
 Many races in the U - (continually being taught the knowledge of U)  
 Life starts with interaction of a few fields - leads to intelligence  
 In the end it creates a structure like the brain - in the center is a soul  
 Mankind has not been the first one, and shall never be the last one.  
 I have been teaching races for a very long time  
 We have truly opened a new era with this technology  
 I love to KS as the front runners in T - they bring the ethos

## ENGLISH TRANSCRIPTION

(:07). K- ... This is the knowledge of the Creator, and I know how man will change and evolve to the new challenges of deep space. As we open the Linz permanent exhibition,

one of the German newspapers writing a half a page article about the exhibition center (EC), they wrote, "this is where the Messiah sells his products." They made us laugh, that we prefer to sell products, to sell the knowledge, that people learn with it, and develop the skills of surviving in deep space. Then imprisoning, taking the Soul of the Man (STM) to ransom, be it in churches and everything else, to frighten the man from the knowledge of God. In that process, it is very interesting, as we said, the messengers of the present time, carry both the soul, what we call, the development of the soul, and the knowledge together, that no man will be able to abuse another man from now on. So if we are all Messiahs and we all teach the knowledge, that there is no more need for temples, no more need for Mosques, and .. churches, that then we abuse the STM, because he is frightened of the knowledge he is not aware of. It's very interesting, as we launched a new product last week, we have raised a lot of what we call, questions, a lot of new ways of looking at space T, and a lot of, what's next. The launch of the spaceship flight system, which was launched in a very soft way last week, is the beginning of the change, that we are bringing in. Would you like to play the video that we see what we are talking about. This is the actual system, (:10). you have seen it as an Enhancement Unit (EU) it's just adding a flight system to it. This is not something to be built, to be done.

Plays video . (:12). ..

This is a change, this is a change in the way, that the system is already been built completely. You have seen this system in the EC without the front end. The system is fully integrated structure we are setting up and testing its, what we call final version of the flight system. The KF space energy company in Iran, and we have done the same in other parts of the world. We enter space travel not just by selling the system, by organizing the whole .. progress, travel, shipping, and everything else. The breakthrough with this T, is that every man can have access to it. You don't need to have a specific style of life and strength to become an astronaut. All of us, either by snap of a finger, by getting into it, the way we get into the aircrafts of today, fly from one point to another, we can travel now the depth of the space.

As I was explaining to .. our team, the beauty with this is that, the structure of the design of the flight system is, (:14). while it is flying you, it's feeding you. While it's flying you, it's taking what you don't need as an energy. At the same time, while it's flying it absorbs energy from the cosmos, it absorbs energy from the environment. At the same time it creates a dynamic field, which allows for what the system doesn't need to be given out. This integrated system will change every life.

As we have placed the orders for the first units to shipped and be assembled, and in our talks with officials, they will take and be present in the full assembly, that covers all the regulations of the flight system. This brings a fantastic position for all of us. The new system is not a flying car, it's a living car. It's ?? a living system, by entering it, by setting the system, that you travel to one point or the other, you can recover from illnesses. The beauty with this system is, that it flies at a higher altitude than, what we call, 80 km. Which means any law, which we have in the aircraft industry, and international laws of the government does not comply.

What does this mean? This means we can place a number of these in the deep space. What does this mean? (:16). We can land a number of these on the moon. We were discussing this with what we call people who are expert in flight systems, and the rest. We are talking maybe 10 - 15 minutes - 20 minutes flight maybe ?? more.

Our biggest problem is not the flight time, our biggest problem is approach, stop, and landing. This new T will change all our lives. We try from November on, to take you with us in the development in the structure, and in assembly of the system. We are not there to deliver a T in a package. We are there to spread a T on the work where we can change position and direction. As you've seen, as part of this video ... you have a passenger system for long haul. Now, from now on when you speaking about the long haul, we are talking about maybe Mars, beyond solar system. Short haul is traveling between the cities and towns on this planet.

You have a cargo system, which means you can deliver directly from the factory to any point of sale, (:18). in seconds, in minutes. This will change the whole structure of man's work. (I do apologize I have something in my throat). But the beauty with this system is that, we all become free from the wheels, we become free from being attached to what they call, human race, "the 4 wheelers." We come to see , we become part of the structure of the U Community, where we travel with the flow of the fields, not with the turn of the wheel.

This T, which now we put out, and I am sure, I was thinking this morning, that we have placed the EU, the VEU, the new operation of the Vision and what we call, enhancement of the brain, in Arizona (AZ). It will be nice if the Americans collectively, could come together to allow the first 2 or 3 to fly from AZ into space. At the same time we'll fly these from other locations around the world. We are not making one system ready, we are making multiple systems ready. This time it's not waiting for NASA, (:20). to announce the launch, or Iranian space agency to announce the launch, or the Chinese. This time we try collectively to fly 4 or 6 of them across this planet. Some of us will travel from New York to London, .. Tehran to .. We have a big problem with the space, in going to the moon, because of the Islamic religion and the holiness of the moon. We can travel to Mars. We can change the structure of the work collectively as KS.

When we developed the MaGrav systems, many of you tried and failed, or couldn't achieve, actually get to the point. We lead you all step by step, but the principle of the work in all these systems is the MaGrav system. It's the most advanced versions of the MaGrav systems. Where we can through the structure. If you remember, I said very recently, again, and I repeat it, when John in AZ setup so many MaGrav systems, and he could feel the fields and they went outside to measure the fields, 200 feet away and the rest of it. John was on the right track. But the collective understanding of the KS was not there. The anxiousness to create some electricity, fooled the man from the stage and understanding of the flight.

All of these systems in front of you, moving to the Moon,, (:22). return and then back to earth. Submerging into the oceans of the world and living, is not a theory or dream anymore. These machines will give you everything, because the beauty with them is, they create a shield, they create a M field protection at all times. It's you who decides, is this to protect you on earth's atmosphere, to protect you in the depths of the oceans, or .. in the deep space. Inside we have created an exact copy of life on earth. We have to keep in the integrity of the whole system, too many factors, one is the G field forces of the earth, and secondly is that the integrity of the G field of the earth in the body of the man in the flow of the dynamic fields of the red blood cells. Which means as the gravity of the earth is connected to Fe, and it has allowed the Fe within the structure of the hemoglobin, to work, we have to keep this integrity across the planet, across the U. This is how we know, when we see a soul, when we see a physical body, which is from the earth, fingerprint sits within it. It's not teaching how to make Gans's for this disease, or that disease, now the concentration is on a fully integrated system, (:24). which feeds you, take from you what you don't need, support you psychologically, support your soul and STP, and at the same time takes you into the depth of the U, or the depths of the ocean.

In a new system, which will be shown in the next couple of weeks, 48 of these units has been sold, and will be shipped to AZ in very short time, maybe next few weeks, start it. The reason we launch these units now, is a simple fact, as you see these systems don't carry any wheels, don't carry anything. In the integral and part of the structure of the system, the passengers, the captain, just needs to think, and the flight will take shape. You don't have standing wheels, we don't have controlling systems. We bring a T where the STM, the intention of being somewhere, the position of understanding an emotion between the STP and STM will bring man to the destination to the point where he needs to be, or he wants to be, or where he has to be. In a way, the new EU flight system are soul driven systems. You will see the first, what we call Vision EU, soul or whatever you called, brain EU in next couple of weeks. (:26). Then this will be integrated into their flight system, which hopefully will take shape in the following month.

We are not going to build a system (could you please show the EU .. ) The beauty with this is, that if you look, you see the shape. We are not there to develop the new T, from the beginning when I designed this system I set it up to become a space system . We are not going to strive into something else. When you look at this system, we deliberately at the time, we showed you very simply, you see the reactors inside, they are all hanging. Please show HEU video. Now you can see it is not a dream. The system is already with us. ... (:28). ... Now you see in this picture, the system you saw hanging out, is built within the system. The advancement in T, and what it took us about a year and a half to further develop, now you don't see those reactors hanging. If you came to the EC, if you came to the .. you saw the reactors outside, in a way it was good, you could relate to them. Now when you look at this system, or the VEU, the T is so advanced that we have built it within the structure. This allows us to interact in different ways, and different needs with every part of the process.

When we announced about the plasma packages, which is now again, is going around, a lot of people are having the problem, and then start using the Gans's, they've seen the

effectiveness of Gans's, how even with the latest powerful one, they are walking away from it. In these systems, when you go into deep space, (:30). when you put the man inside, it doesn't matter what happens to, into every plasmatic energy in the U, the body is protected. It's on a double layer, triple layer, if you understand the whole process.

In so many ways, we give you the system inside, we give you the system outside, and on top of it we create shield field effect. Man has never traveled so well protected, ever in his life, not even when he walks on the street. This new T allows a massive change, massive rapid development in many aspects of the work within the structure of the need of the man. What will happen when you can walk into these systems and get fed, .. and change the changes what was not needed, and called it a cancer and everything else. The new T, which you will most probably in the coming year, walk into, across these countries of man, which we will become One Nation, will change the dimension (D) of life.

Today we hear about shortages of food, shortages of fuel, increased prices of fuel for the winter. Do we have, will the world leaders allow this to carry on. When we can in a very simple way, (:32). just place a number of these systems, and create the D of food, that every citizen under the coverage of it will not feel hunger. The same as we do inside our system, we can create the condition, that in interaction of the systems to create the same. The point where, if the energy packages come in, we can overcome by those, the same structure the same. Would the man needs the farms to survive. Would the man needs to kill another animal to survive. We cannot farm in the depth of the space, and we have no animals to kill to feed ourselves. But we have learned to use the energies of the U. We understand this very little system, that you've seen today, running across our systems, across our screens, is a game changer, is a game changer that is not going to come, it's a changer which has already come. It's a game changer, that will bring mankind to take the first steps to become part of the U Community, because as we learn how to fly faster, how to become more comfortable with the system to find new D and operations of it. I promise you one thing, for sure, they will come to visit other passengers of the U, (:34). which are zigzagging the space of the solar system, the space of this galaxy, and the space of this U. We do not, we are not, and we are not set to bring, to negotiate with governments. As have been the tradition, we gave a chance to the governments to walk themselves into it. Now we create the systems, that the citizens can use it.

Then would there be a need for a government, unless we govern ourselves in the depth of the space, the way it should be. As I always said, if man keeps to the ethos from the "3 Kings from Iran," from the land of Persia, do good, act good and think good, you will understand, the man will survive across the U. We need no temple except the temple of his soul, the beliefs in the conduct of the correct behavior.

The new EU, which you see it, in design, and now you see it in physical D, will be on the table of the games of the man's life from now on. It's the job of the Knowledge Seekers (KS) to start to understand the work of what we started a long time ago. We don't need, or maybe we need, the hidden groups setup by Jalal to develop a new MaGrav. (:36). We are still setting up a factory in Tehran to produce MaGravs for their nation, because

mankind will be in different stages of development. We sure, for sure will launch the first flight system, across the city of Linz, where we test flight, where we talk to the governments and the officials, and those who are responsible, to be able to bring the nations to see. The new flight EU, which will be shown by the KF in the coming weeks. The order of the flights, building the units has already been signed, the money for the building of the sets has already been paid, to start rolling in.

Then it comes, how many of you would like to be the first passengers? How many of you will have a correct conduct, to get in and by using the Vision EU, you see a vision of the U. "I fly to the position." Many of you were offered this vision units, offered what we call, the soul EU. You were thinking of the eye of the man. We talk about the vision of them to see the U he likes to see. Where does the soul position sit. Where would the STM be when it detaches from D of physicality? That will be my home. As I said, our teachings are global teachings, as global as the U. (:38). Many of you fall in the traps of the word of the man.

The new flight EU, is the collection of the all the EU technologies, which KF has shown up to now, be it the MaGrav unit, be it the Gans's for viruses, be it the CL and everything else. Collective knowledge of what you have been taught is within this system. As I said, last week, and many of you might have not understood. You have Book 1 .. Book 2, and Book 3. Now you have your EU, which way do you want it to fly, in direction of matter state, or in the direction of the soul and deep space? Now with the thoughts you have, you decide where to be, where to reside, how to be, and how to behave. Then do we need to negotiate for a few little metal scraps in any shape or form. Do we need to come to an arrangement to understand what we need to do? (:40).

Now we see a change and evolution in science, and if Rick could make the screen in half and show .. the flight systems as it is in Linz. We are not going to build, we have already built. We are not going to promise 6th of June, because we might hit it 21st of December for the birthday of Mitra. That would be the gift to humanity, and we make every effort to achieve it. In so many ways, none of you have realized how close you have become, that all of you, to become man of space. And yes, Messiah sells T for the man who only sees value when he pays for it, but does not realize the freedom of the knowledge, which is given to him freely.

In total understanding of last week teaching, and this weeks teaching is for all of us. Is not a promise that the change will come. The change has come. It's not a promise, (:42). that man will fly to space and deep space in minutes. Now you can do. As I remember when we tested the first reactors in Tehran Shirif University, one of the officials said, Mr. Keshe this will go through the ceiling. I said, why it's our building, it shows our strength let it go. Now we let the knowledge to go through the ceiling of the U. It's on man to decide in which steps he would like to take, to be part of, to understand the T is so real. We are not going to develop, we as KS, collectively have developed. It is for us to understand, .. to realize that the new flight EU will change your lives, .. everything you could imagine, from education to understanding the work of your body. You receive the Knowledge of the U, that there are no universities on the earth to teach you. Man will

become knowledgeable to the Knowledge of U with the flick of a finger, if the STM in truth, abides by the law of Mitra. Then you'll understand that every gift has been given to you.

We will bring what we call, the structure of the new institute, (:44). to you as KS. We do not negotiate with governments, as by delivering such a T, we govern through the law of the Creator. I am the Messiah, and I will show you how, those who take actions to make time to create tools of death, will have no time and no place to be as part of the Soul of the Man's race. It's the beginning of the change, that every one of you can be a part of it. We can control it, we can emotionally feel it, from thousands and hundreds of kilometers away. Remote sensor control by the feel of the man, it's already been tested because of this system. And people who use it, they know. They feel when the system is on, thousands of km away. But this is the same, you feel what is, where you are connected billions of km away from man. Look here, the call is in the soul of the mother, and you respond to, through the STM. The reality as we said, is very real, and it sits in front of you. Now we as a human race have become the true man of space. (:46). But still as the paper said, "Messiah sells T," that the man does not become slave to another magician in the space. I sell T of the knowledge of the creation. Those who understand it, will take the steps further, and will never sell their soul to another magician in the name of prophet, or whatever they come across.

The body of these systems have started to be manufactured in China. Next few weeks we'll be landing in the factory in Austria. In a few weeks later, upon its return, then we'll fly from different corners of this planet. I wonder how many KS will want to be a part of it. Many of you will give your life to be in it, as the first passengers. Those who understand the change in the structure of the STM and evolution of the new science and T. I wonder how many of you will travel from Beijing to Washington for a cup of tea, and return 10 minutes later.

As I was explaining to what we call, experts in the past few days. We do not travel from Washington to Beijing following the curvature, we travel on destination point. (:48). For the first time, man will see, yes, the light bends, because the T of understanding the knowledge, would ?? allow the man to fly with the light, which bends. Which means you travel in the speed of light within the atmospheric condition of the earth. Now you understand what we showed you as a small video to get you moving, now it has started. This is why if you go back some times ago, I said people who get into .. the flight systems have to accept, and be accepted, because even the system has a soul and recognizes the man. You enter another live D, .. another process, which already has linked itself, all the correct emotions and directions of ?? Universe. I hope now you all can see, not what is about to come, but very quietly and incredibly we brought to you, and we set it in the EC.

I hope mankind will understand this knowledge. I hope mankind will become kind to himself, (:50). to decipher the knowledge within the system, feeding system, processing of the body system, and processing of the soul system. Maturing man to become a peaceful man as he sees what he has, is all he needs. Messiah accepts it, his first

passenger is to travel to the Moon and to the Mars, next. And yes, we sell our T to the STM, and the man decides. My wish is, because of the ?? we know, to fly the systems in the next few months across this planet, and slowly man realizes the time of burning, destruction, the time of killing is over. As we see more and more of these flying above us, as we fly more and more of these to our systems, that our cars become our home, where we get fed, and where we can travel with, then we gradually change. We look at the animals in the fields, to enjoy their beauty, and not to think how they will taste if we get them. Gradually mankind will become mature to understand.

You throw every Sunday, (:52). Gans's in the rivers and the streets. When these systems fly, they will release energies, which will change the whole structure of this planet. I wonder in ?? so many years from now, what would happen to the streams, fields, run ways, and sky scrapers man has built over decades, centuries, and thousands of years. Where you don't need to have your 4 wheeler, the grass will appear over the roads, the tall buildings will crumble as there are no citizens to live in it. The fields will go back to the original as there is no man to eat, and animals will be free, where there is no man to kill them. These are not wishes these are the facts, because I sit in the lab, I hold the design of the reactors, and the reactors in my hands, and I know what the future is about to be. I know the race of the man as of now, will change, to become a peaceful race. I know that with this T in front of you, this time when you get hungry you just walk into it.

We don't ask your governments to create satellites that you get a better football match. You ask your governments to put these systems in satellites that the whole citizens gets food, (:54). and ?? energy, and what it doesn't need, the sickness, cancer will be a dream of the past. Hunger will not exist and no man will be thirsty, as he receives the energy of the water from the space of the time and place. Not by drinking. This is how man will live in the space. You do not carry water bottles for you in the space, that you get thirsty, but you receive the energy of the liquid, which sustains the dynamism of your M fields, does not matter if it is blood, or something else. The true blood of the man will come out of the interaction of the fields of the M field, which the system creates, and the body takes.

One of the biggest questions for the man will be, when you become a long term traveler in deep space, would you have the heart, do you have a need for the ?? wings to flow the M fields to create the essence of the physicality and the interaction of the, with the STM to create the emotion of the man. Give me another few months and many of you will understand. I am the Messiah, in as much as you are, in the direction of deciding how your souls will behave, and how you become, not to kill, not to eat, not to destroy, and bring humanity on the track, that the STM becomes the flowers, that this planet exports to its perfection. (:56).

I hope you understand, that the dream of the man to become the man of space in a different time and place, we will see the change in the structure of the government of this planet. We will see the change in the D of the control of the fields of this planet. As you have seen the pictures of the EU, I am not a dreamer, we have the system, and very soon you will be part of it, to fly with it, to be with it, to enjoy it. In so many ways, remember

that your children are born, and they will be born free, in a free world, where there shall be no wrong ways, ?? going the man.

And yes, Messiah sells T, T how to change the man, but the man needs to understand it, step by step, otherwise he will not appreciate the beauty of the knowledge. We go to another commercial break .. but remember one thing, any of you can become owner of one of these spaceships, and decide where in the U, he or she wants to go. Or collectively KS can become part of the structure of the change through agreements with the KF, (:58). for these systems across this planet, as fast as we can. I hope in a further time down the line, we create the body of these systems through M fields, very much like in deep space, as we see neutron stars, that we will not even need materials to develop to bring them into development. You will understand what I am talking about in a few months time, in 2 or 3 years when you look back, and while you look at these pictures on your screen you see, ?? what is flying above, and then you understand the vision of the Creator, how man will change, and gradually become part of the U Community. Rick would you like to go for a break

>> **BREAK** >> 403 KSW Oct 21, 2021 (1:00). (1:04).

K-

Q: Brazil, (1:06). ... The EU you talk about having some elements (reactors) to make the transportation of people. These elements that you put in the EU, can you put these reactor in the cities without the use of the EU .

K- Can you explain what you means.

Q: (1:08). .. these systems which are embedded inside the EU can be put in the cities so people can make the transportation themselves without the need of putting the EU itself in the city.

K- What do you mean put in cities?

Q: ...

K- I mean you set it for the cities. (1:10). this is what we said yesterday. This can be set to do this. We already explained you can cover massive areas, once the knowledge of the man becomes complete.

Any other question.

Q: .. Will the friction created by the MaGrav of the spaceship, and the plasmatic fields of the M fields of the matter environment, create visible light, making the spaceship (SS) glow while flying ?

K- Yes, it is quite possible, depends what spectrum of friction or interaction of the fields, creates the friction. We will see these without a shadow of doubts, we'll see lights. We will see a D of interactions and yes, it's inevitable. These are dynamic systems, you have

a dynamic field. In the lab, when we test, we feel the fields in our body. (1:12). We can feel it, what they create, what emotion they create in us, what physical change they create. The beauty with the new EU system, with what we are designing and testing at the moment, is that they will create cosmic rays, and rays and fields, which are not known to man. These will interact with the environment in a way, that we have not seen before. This is why we allow KS gradually to come to the knowledge, because otherwise it just flies over their heads and they don't understand.

There is a lot to be understood, there is a lot not only to be understood by the KS, to be understood by the society, by man of science, by man of whatever you call it. Because I was explaining this .. and I explained this before if you have been around me, if not you will understand. When we opened the first factory in .. the North of Italy, KF went and employed one of the top managements in one of the top companies of the steel manufacturing in Italy. Paying massive wages, because he was one of the best managers, he could bring everything out. After a few weeks of operation we saw there was a problem. (1:14). There was a huge problem. I went to the factory and I noticed something very strange, because even though the man was a manager, top companies, he was well thought after, he couldn't understand. I walking into the factory the first thing I saw was a pile of, maybe a meter high, maybe more, like a mountain, of MaGrav systems coils coated piled on top of each other. I said, to him, do you know what you are doing. He said, yes, they are Nano coated waiting to go into the MaGrav systems. I said, do you know what the problem is with your MaGrav system is that these Nano layers should not be touched, not be damaged, otherwise they don't work, that's why you have a problem in your MaGrav systems. Because the man didn't understand the knowledge, even though he was very knowledgeable in steel, he had no knowledge of Nano (N) technology, layering, and how delicate it was, even with his PhD and everything else. He was a very elegant man, perfect Italian in a lot of ways, but never understood the knowledge. This is a problem we have with a lot of KS. When you make a MaGrav system, watch what you are doing, how you touch, .. hang it, how you do it, and then you get a different field operation. Rapid, zap it, and put it in there, and it doesn't work. Of course. Have you ever managed to bake a bread by just putting the oven at 360 and just putting the dough and waiting 5 minutes to eat, unless you burn it. (1:16).

KS gradually have to understand, even what does it mean traveling in this system. What can I do in this system. With this system we fly over a certain limit, there is no international law. They told us in a meeting, that you need to go to a space agency, because above 80, it becomes part of the space. I said, the people of the space don't even understand the T, why should I go and ask them. They have to come and ask us, how you do it. They can't set the standard for us, when we created the standard. They are still trying to sort something out in the space lab, they are trying to sort something out to land on the Moon, in a few years time, to maybe build a few centers there, and taking pieces and pieces. You walk in, you can live on the Moon with this T. It's exactly how you live within the womb of your mother. You come as a single sperm and an egg, and you become a total human being, which the environment of the womb of the mother creates. It's the same.

Now you have the ability to, as I always said, to increase and bring in the tent of the fields, and then you can live anywhere in the U. When I did one of the first tests in Iran in Shirif University, we used to be in 4 or 5 beautiful story block here, and the office of the manager was on the top, (1:18). and I was on the first floor. One day there was a knock on door of lab, and the guy said, excuse me, can you switch off your system, because nobody can call in or call out of this building. Thousands of square meters office block was paralyzed with this simple system.

But do we look at it that this gives us difficulty, or do we look at it as this gives us a chance to increase the fields, combination of the fields, and create a dome of life anywhere in the U. It's the narrow-mindedness of the man who makes his road and path narrow to walk on. This is what, we have become so narrow-minded, that we only look at the material and matter state. Now when we look at the field state it's a different ball game. These systems are there to create that initial school of thought, that he can do the next step. Would our children need a vehicle to travel, when through understanding of a generation of these technologies, understand the soul of them ?? is a flight ?? Now we don't ?? have ?? time, the Messiah can answer anymore ?? We pack up shop and go somewhere else. Maybe another planet Zeus to change the man from being a wild thing, to become a beautiful tame , (1:20). and understanding, or more enhanced knowledge of others in the U. Try to understand the interaction of the fields, and then you can be everything that you can imagine. Nobody can sell it to you as a prophet. That's ?? what I always tell them, I am the Messiah, but the Messiah of my own physicality and my own soul. Let's see if you understand it. I tell you one thing, which I have said very recently, and you have heard it, very soon the world religious leaders will take their turbans off and their hats and crowns and they'll walk as normal man on the street, as the man become wise to the knowledge of the Creator, and no one can be in-between or translator. Shall be the same with the kings, those who think they can keep the others. Where man realizes the kingdom is within the structure of the knowledge, not with a fake crown on the head.

Any other question.

Q: Guatua, .. (1:22). again we are running out of words to express this T. ... Your T is more than amazing. ...

K- It's our T and collectively we are developing it ..

Q: You say this system can take 4 passengers and because there is no wheel, including the steering wheel, which of the souls of the 4, will think, and then the Spaceship unit will go to Moon or another place. How about if 2 of the 4 passengers are thinking in a different, one thinks of going to Moon, and the other thinks of going to Mars. So what determines where does the system goes?

K- We were discussing this in the past few days, that how it works. You know, (1:24). the best way I can explain it, we call it in Farsi .. "taro" in Persian language it's very common, you say someone, you go first, (the other) says, no, no, you go first. While actually I want you to go first because I value you more. So we have ?? (yes - no gong back and forth) ... in the process of the traveling with this system, the respect of the power of the soul of the one, which is valued and respected, will take the position and the D. You want to go to the moon, I want to go to the Mars. But what is the what I call, "the

discretion of the balance of the souls" which will decide. I want to go to Mars, but you are more anxious to go to the moon, you can takeoff, I go to the next. You will not be abandoned, because the captain is gone, the captain is you, because ?? made the condition of. It's very much understanding the work of the soul, and then you don't get abandoned in the middle of the U, because the captain came off and went for a walk, to see something, and he ?? went to do it for a 1000 years. The beauty of these systems is how you get connected and how it connects with you. You will understand these more and more, we are doing a lot of tests in the background, (1:26). and it's beautiful how we see these things ?? filling up , as we are putting systems together to, in a way, to communicate and find a balance within the souls. If you notice I said, the control system in these systems, is not built, that when you put the helmets on your head, you become the captain. The system is built within the structure, that everyone, collective balance will become the captain. Man has a lot to learn. We are building these systems in the progressive development of the KS in the background, who have reached the point of maturity to understand.

Q: .. this question is loaded. .. Is the first flight going to takeoff from Iran, either on December 21, we as you said, or on 6th June 2022. Why Iran or why not?

K- Iran is the mother birth of western civilization, as I explained this before, we know it, and we understand it. (1:28). On the other hand, Iran is where the Mitra came from, the land of peace, the land of understanding, and thirdly, we choose Iran, because it is the mother point birth of most of the living civilizations, connections in all dimensions. I explained this before and in time you will understand more and more about it, and secondly we are not restricting the flights to Iran only. If you listen to the teaching, we opened the D to different countries and nations. We'll be receiving 3 units a week. By the time we have the first flight systems ready and packed to go and everything else, we'll have most probably 10 of them on the runway, in the assembly. And gradually we deliver these step by step to countries which purchased one. And then we put them into flight.

Don't forget citizens of each nation has to come to take their system to their nation. I am not a pilot, and I am not a deliveryman. Or do you want your system to be on the waters and the trains for 8 to 10 weeks. Where those of you who bought it, you come and take it, and guaranteed that it flies and stays ?? with you. You understand gradually, what we are aiming at. You'll understand gradually how we set the systems separately, (1:30). the EU, Body EU, VEU, HEU, the Brain unit, because the man will suffer in different ways, and it needs to be adjusted in different ways. These EU will take a long time for mankind to be able all of you, ?? unless you receive ?? achievement and development in the soul of the collective man. You got to realize one thing, that, once we blow the wind of the knowledge of the U to the STM, every soul will, on this planet, will be educated. But not all souls are ready to go through that D.

Any other questions

K- I hope you (Dr. Guatua) will be one of those who will take one. That's one of my deepest wishes.

Q: I look forward to bring exactly that as soon as possible.

K- I am ??

Q: Staephania, ... (1:32). Can you hear me properly ..

K- The whole U can hear you

Q: As you always said the teaching is not just for the world ... Regarding the space craft. There are 4 spaces, . you remind me a lot of the MOJHAN. You said this EU would be like, to teach us to fly. .. that will be like a pilot in a simulator .. we will learn how to fly with no fear. My assumption it's like .. in the MOJHAN we supposed to fly, but we only had our body. .. You said, our body is our space craft. In the MOJHAN (1:34). you taught us about the soul, where it is, how to interact, then towards the end you brought us the flight... you saw yourself like a midwife for mankind to take us to the next step. Everything you said, it always became reality. .. when you ask us to .. how the soul works .. all the teaching you gave to everybody .. it was a life changing experience for me, the Mojhan. It changed completely my life, never the same .. because many things happened .. that became reality. When we were supposed to fly .. I had fear. you told us too, so it's not like I imagined it. You told us the reason why I start to rotate really fast was because I had fear. (1:36). The fear take and you ?? didn't stay straight, so I kind of stopped all the process, because of fear. A few workshops ago you said, .. it would take off the fear. So my assumption is .. we will do like the Mojhan .. be able to make the space craft with our body, but the machine is going to give us support on the transition and take off the fear. this is my assumption. Is it like this?

K- As Mojhan both in Ghana and especially in China, you were taught and matured to be able to fly with your soul. But as I said, you were not matured to see the knowledge. All Mojhan, those who came through it and they ?? understood it, .. we see this system on the screen, the knowledge you were given is the next step, even the next step after this system. As I said, before where you learn to travel with your soul, .. live through your soul. This is important to all of us.

The Mojhan were given the knowledge in full, but to the lack of understanding and the greed, and whatever you might call it, the greed for knowledge. not the financial greed... (1:38). very soon they'll come to understand. Many times I wish I would have taken more KS as Mojhan, that one of them would have elevated through the understanding and teach the others to become, to travel through the soul. Some of you took little, some of you were not there to take little, you were just there to see what you can do, and how it is going to change you, but you never understood the knowledge was given within, within your soul, and then if you understood it. In a few months, few more teachings, now I know I was told how to change, and now I can do. We are getting very close to those who were true Mojhan, to even, they start understanding how their souls will become the vehicle for them to become the next passengers of the space. You became a U Council member and at the same time Mojhan, you will see the structure of the change faster than the others, most probably. It's understanding it, it's not just listening to it.

Q: I have to say, for me was really life changing ... Do you remember .. when my skin changed color. There was a point that everything you were saying in the morning, it would happen in the evening. (1:40). To me, when I look back ... that for me was the reality for how everything is. You gave us the opportunity. It's when a woman gets pregnant and suddenly her body change, it's not under their control to become bigger and accommodate their body for the baby. When the last day when you told us to fly, and we

went into Star-Formation, and it was like engine, a machine who start up. It was like something .. bigger. Like the same as a mother, her body change, like you said, always, you don't have control on your heart, the beating every night, all night long, you are not aware of the processes that are happening inside your body, but they are happening, there's this intelligence, that your body has to make all this happening, while you are doing other stuff.

So when we were supposed to fly, I felt certain things that were real to me, and to others, because I wasn't on my own, we were 4. When things start happening, it was like death, ?? intelligence took over. But it was like what you said, (1:42). you cannot think, it's not about thinking, when you think it's not it, things start happening. But at the same time, .. we don't loss our physical, "me" whatever. The fear took over, because I could tell we were going something bigger was going to happen next, and I didn't .. when .. we have to be ready to let go of everything. It's like a, what you always said, when someone is ready to die, is ready to let go everything. I realized at that point that obviously I was not ready, obviously. So I tried to stop with the process. I did felt a little bit like a failure, .. then I looked back, and it was a big .. lesson, and this was all real. What I understood was exactly what you said, we are creating conditions, and then the things happen. I think this is what we are doing now, we creating conditions for things to happen, and the things will happen. That's why part of the condition is to be really ready to have this full trust, and not to have fear. I understood .. there is not space for fear. I understood the fear, (1:44). will go away with the knowledge, with the understanding, so obviously I agree when you said, that we were not ready, otherwise we would have done it. Because everything you said happened, without us doing anything. Everything happened very spontaneously towards the end of the Mojhan. .. you also said to us, when we are on the plane, not to connect, otherwise it will stop the plane. Many things happened during the Mojhans that I will never forget. They were very real .. I wish I will never let you down.

K- No, you haven't let anyone down, you just gradually mature to understand it faster than the others. In a way, you have been trained for it, you have been taught what to look for. We had those KS who came to be KS as Mojhans, but they had a different agenda, and then we had KS who came to be Mojhans, and they truly were there to achieve it. You talk about the 4 chairs in the slide (system), why to we introduce the 4 chair system to start with. Look at the Star Formation, 4 system, and then the connection to the soul will decide with the soul of the system. This system is not a structure, this system is alive, it interacts with you, knows your need, gives you what you need, and takes what you don't need. (1:46). Unfortunately, if you look at this structure, have you seen a toilet yet. When they cut it layer by layer (cross sections) have you seen any facilities for you to get rid of what you don't need, because the system will take everything what you don't need. The man will change in these systems.

Some of the KS don't know. The KS who became Mojhans, and joined us in Ghana for a few weeks, then we flew them to China, and they stayed with us there for a few more weeks. We promised we'd bring them together. That bringing together is when the soul matures to be. And those who have not understood will be weeded out. The time for development of the soul comes step by step. Then when you understand it you become

the pearls of, in a way, the lamps to guide the others to follow. You don't become prophets, you become the ones which burns to let the others to see the way, the path. It was beautiful to see how a few of the KS literally achieved the D of the progress of their soul, to become the true Mojhans. I saw one .. two, and one which came there with the greed of the time, not with knowledge of the time, and you still see them. We are very visual, we see everything. It's amazing how knowledge will come back, once you learn it, it's embedded in you. Thank you very much ...

As you can see we haven't allocated any kitchen, dining table, toilets, (1:48). or anything else .. Because the system is unified, the system will take what you don't need, and give you what you need.

Q: .. you also said something that you repeated last Thursday, ... that you can move the earth, the position of the earth, the 4 of you, but this I don't know if I remembered correctly, the 4 of us, when you can go around the earth, and change the fields of the earth, and be able to move the earth. This remind me .. when you talk about the space craft like stars in the U. That remind me of that, what you told us in the Mojhan, I (first) understood it last week when you talk about the star. I didn't quite understand it at the time.

K- ... Gradually we understand ourselves little by little, more of whatever little we know.

Any other question.

Q: (1:50). ..Taking advantage of space how do we achieve harmony between the crew, the STM, the STP, and the physicality. He adds, the physicality always does something on impulse?

K- Soon you will learn, that there is no such a thing, and there is no captain. When man enters these systems, he becomes a peaceful man. There is no greed in the man. There is nothing, you feel peaceful, .. serene, .. "I have everything I want," I am not hungry, I don't need food, I don't need to work, I don't need warmth. both ?? the emotion of the completion, is one of the one things, that those who become passengers of these vehicles will feel. I am complete. Man has not, or does not have this emotion, and such developed it. "I have everything I need." When you are passengers of these systems, the way they work, and the way they structure the field balances of the body, you might walk for months without ever need to take food, because the fields setup around you within the structure of the cell, still interacts with its environment, does not need the machine. There is a lot to learn, .. to come, .. for man to explore to understand. (1:52).

Q: .. Are 2 spaceships able to communicate with each other, similar with how 1 submarine makes contact with other submarines by tuning into 2 different frequencies of radio waves. Other question .. can 2 flight units meet during the trip?

K - Of course. You interact. In the development of the T when you understand more, it's very simple, I just explained, when you expand the fields around you, to make a shield, or you create an environment to sit. What you are asking, is just to connect the fields of the two, or the 3. When you create a similar field strength, you become part of one, you can

jump from one to another. Then we'll learn a lot very much faster. Time has come to mature.

Q: .. You said, that while flying it enhances the soul. Is this, (1:54). the beginning of freedom of man, and in order to fly through the soul?

K- This is what I come to teach you gradually, yes, for those who are ready for it. I said many times, there's a very beautiful English saying, you can take a horse to the water, but you can't make it to drink. Because he is not thirsty. Man is not thirsty for peace, man is not thirsty for not to need to kill. Man is thirsty to kill, to be above, to be something more.

Q: When will there be an exhibition in Brazil .. T fair?

K- I don't know. At the moment we are pushing with what we have in Linz. Gradually building it up, most probably. You got to realize KF is on a very, very delicate path, world leaders who are what they call themselves, "superpowers" don't want to loose the position. So KF is sharing knowledge, such that everybody can go everywhere. Is a problem. So in a way, we want to have the T, but we don't want to allow the others to have it, ?? otherwise we all become equal. At the same time part of the problem with the KF, (1:56). is we show you how is a new true D of your soul, and understanding it walk away from religions. So religious leaders are not so good with us either.

But the only thing they don't understand is, we are here to bring the change, and to see the change to go through. This time man will walk out of this planet as a peaceful man, as a man who believes in himself, and understands the process of creation, that no one can cheat him, in the name of ?? And this is what it is, important for all of you to understand. We are giving you the freedom of yourself, we are not ?? saving you to become ?? part of ?? If you understood this ?? if you haven't understood this ?? ??? ?? in the maze of the knowledge, and maze of lack of understanding, what we call, understanding of the process of creation. If you listen to all the teachings and understand some of the teachings, true meaning of it, many of you should have traveled with your soul. Many of you would have understood the operation of your engine, center. We don't need to be in Brazil, or in Mexico, and create an exhibition somewhere. At the moment any one place is good enough for us. We are here in Linz and we show the T. It's for the others to do. (1:58). As the German newspaper article said, "Messiah sells." We prefer to sell, than enslave the soul.

If you notice for past years, many of you KS, who are in the background or with us, you have offered us hundreds of thousands square meters of land, you have offered us the most prestigious properties around the world, .. farms, .. buildings, .. everything. The Foundation has refused. If you made a financial donation that allows the expansion of the T, that we ?? spend to do it, we accept. But if you have offered us, how many of you, I can call one by one, can come online, assets - real properties, things you developed, we are not interested. There shall be no temples in the path of the belief of the soul. We are not here to do what we have seen, has been done wrong to man. You build EC to elevate the STM to teach, to believe in the suffering ?? support. But when I look back at the KF, people offering us unlimited land, "I want you to build," to have, to bring, they all made

terms ?? I created the temple of T in your hearts and souls, and that's all that counts. It's you who have to keep that candle, and make it to burn bright. It's as simple as that. (2:00). Where we create the EC in Linz, its for you to come and see to elevate your knowledge, to increase your knowledge, and how you'll do next. When you come in you feel, you understand.  
Any other question

Q: .. Did the government of China in any way, respond to this KF flight unit, with their nuclear capable hypersonic missile, which was published widely in the last few days. Is there any coincidence there?

K- No, you got to realize, we were .. invited by the Chinese to meet in a special meeting for the space flights, and then they realized, that they don't have much to show, but they are talking a lot about something. And they said, no, you cannot see the system, but can you give us the combination of the fuel, that we can test it. The Chinese have not reached the maturity of the T, understanding the work of it.

I told them very recently, you stole from us, you stay till you learn. Chinese stole a lot of T from the KF, in immense ways, and they turn it into their name, that it doesn't show it's from outside. But the step by step, they paid for it. But they changed, you will see. (2:02). You don't need supersonics whatever. As I said to the Iranian officials in past few days, we take the EU ?? flight systems into AZ, because it's ours, it's part of the KF. We take it to Tell Aviv, .. to Jerusalem, .. to Mecca, and let's see who runs faster to get to the other side. We've seen in the past few days Israelis creating a huge budget to be able to do one ?? ?? I call it. The T we have in Iran doesn't need one ??? won't even reach the border. But it has to come from the intelligence of the Iranian leadership to put the hand of peace out to every nation. We gave the knowledge freely in the hand of the Iranian leadership, and somehow, they have to understand how to use it, to change, to bring back the beauty of , not only Zoroaster's, the way Kush ?? ? ? where kings came and wanted to be part of the Persian kingdom, empire because it was a peaceful place. This comes when the maturity of the Iranian leadership, and understanding it. In a way, we open the nuclear centers, and we gift it to the other nations, as the T we have, has already made nuclear T obsolete. What are we negotiating ?? for. As I said to the Iranian leadership very recently, the only nation who has been punished for its development in T, is the Iranian nation, because we are advanced, .. developing, (2:04). T beyond imagination. Sanctions against knowledge, maybe it's time to teach the others, that they become ashamed of themselves.

So don't worry about how and who, we can bring the Chinese supersonic missiles with the one flick of a finger. But that is theirs, they have to develop it to learn, maybe from it, we'll see. As we have seen in the past few days ?? by development of T to destroy each other is the habit of the man, and he has to come to it.

We have to do, we carry on the way we are, irrespective of the governments and nations. KF has become a nation ?? beautifully, so openly, and then you will see how we will add to it. I have already made a nation out of you. You do not even know, what is about to hit the mankind. When you have equal knowledge you already have become equal. We

rule in a different way, than the world leaders. We rule through science, T and the STM. We teach openly at the same time.

Q: .. access to units. .. Can Mr. Keshe lend or offer on credit, (2:06). to KS, the units at a subsidized pricing?

K- You talk to us, we open the channels. Many KS have done may deals with the KF. Even the flight into space we can talk with you. Many KS we allowed the first EU ... You make an offer to the KF and if it is reasonable ?? we can expand on it. We always collaborate. It's your knowledge and T, but we have to expand it, that it doesn't become exclusive.

Q: ... Are these units an evolution of the units from the 292 KSW form 2015 Star F and use of 2 MaGravs ... ?

K- I hope this will bring peace to man, and KS have always been the flag bearer. We have put the price of this system at 10 million, because of a specific reason. KS who have approached us to be able to be part owners of these crafts, we always look into it. When we have the KS who can travel the span of this planet, (2:08). and beyond. Governments have no more say. It means us, as a race take over, equal way together, and we support it. But it has to be understood, .. totally understood. We'll explain very soon, a new way of all the KS, who are a part and in a way, progressive knowledge with us, we'll open a channel to them, that they understand. We open a way to them, that they understand. You talk to us, the KF is open to anything that the knowledge is spread equally across. Many KS soon will become travel agents, when you can get these and transfer passengers to Moon, to Mars, and to New York .. with the flick of finger.

You will see new announcements through deep developments, which we have, within the commercial world in a very, very short time, we are just tidying up the back end. Then you will see how the KF will become one of the largest corporations in the world. Any other question. (2:10).

Q: .. I thought how hard it is to accept to sign the world peace treaty, and recently I have seen consequences of not signing the WPT after the presentation of it. How important is it for the flight systems to be accepted?

K- You have to sign the world peace treaty through your heart, through your soul, not on the paper. We have no papers and no pens. You write with the pen of your soul. This is what we said from the beginning. you see, .. People who instigate wars, and then we find out it is for their own personal benefit. Then we'll see where and how they will end up. How they'll end up. We learned about one of them in past few weeks. .. as they came from the same blood. Netanyahu created Iran as the biggest enemy and start selling arms to protect Moslems ?? sold arms to Saudis, Why? Because he banked 20 - 30 % in his own private banking, private account ..?? created conditions to collect ?? money. Now the world leader has over 2,000 court cases hanging on him. Now was Iran getting to the nuclear position, or was he making the black sheep that he could make ?? money .. (2:12). This is what we have to become alert, and understand. KS have to start becoming wise in how ?? in how they manipulate you, and ?? because the next guy on the Moon,

?? because he can do magic will become ?? prophet. How many of you are going to be ??

You'll soon understand, much more is behind the teaching than we talk. There shall be no king, .. world leaders, .. religious leaders as we all become the religion, leader of our own souls. This is what a lot of people don't like. Because at the moment they are bent on the kissed hand. It's the time when they have to kiss their own hand, of their own demise.

Any other question or shall we call it a day. ... man has moved away ..

Q: Azar . there is a noise that comes from your microphone, like gosh, gosh sound.

K- It is my headphone which is rubbing. .. I try to concentrate on the teaching of the soul, then anything else ?? but at times the microphones moves sometimes. (2:14). The microphone moves. We changed so many microphones to find the right way, without actually bothering Rick. This creates a lot of background noise. Can you hear me now.

R: Yes, I thought you were busy in the background doing some things ..

K- No, it's just that we have been concentrating on the ??

Q: The Spanish group .. would like to begin building a plasma feeding stations, do you have any suggestions for us?

K- Buy a flight system it does feed you and it's

R: So bypass the feeding towers and just go for the flight system.

K- For the flight system flies you, feeds you, does everything else with you.

R: Sounds good.

K- It is good.

This is more or less the beginning of the completion of the T, the next step to this. The reason I introduced the flight system in such a small versatile, is that it can be reached by every man. Then trying to build through the fields, massive space UFOs, this will be done in the coming time.

In coming time, not very long, a number of these systems will be set in the formation, (2:16). that through it, you'll find massive, massive UFOs. In a way, each system will take a place and with it, you create a new ?? D. Not very long to go, once the man gets hold of it, understands it, as I showed you can connect these together, now you can connect it together. He even understands why the shape we chose this way. Little by little, first learn to walk and then we'll see how you run.

Q: ..Having such a revolutionary way of traveling will be to our freedom maybe not to all humans but to those who will own such a spaceship. This is opposite to what the world leaders want , but will force them to change. .. I see this as an open to a new way of living How do you see the future, are we heading as a human race in next 10 to 20 years.

K- We answered that one. There is one thing for sure, in next couple of years, (2:18). we won't colonize the Moon, we'll live on the Moon as we live in another city. We will not colonize Mars and whatever .. we'll live as part of us, as part of the citizens of, we will

talk about solar system, not about planet earth. In the coming time man will ??shape living in the galaxy. We will travel the depth of the space in a very easy way. If those of you mange through the work of the system to elevate the understanding of the knowledge, you will travel the span of the U.

But you are not the first ones, many races have already been through it. So we are not telling you the future, we are telling what has already happened, and is happening to many races. Life starts with the interaction of the few fields, and then interaction brings intelligence, depending on the strength of the field, and intelligence has been created. It's a different path, but at the end, it creates a structure like a brain, structure like physicality, with that structure, understanding in the center is the soul, they create new life, new structure of existence, and application. Mankind has not been the first one, and shall never be the last one. As I say, I am a part time job, and this correcting and teaching and bringing different races to become, to see the path of the Creator is one of the things I have done for a long time, and I think I will be at it after the human race is gone to places in the U, developed gradually, as more fields interact they create new life. Maybe some of it, (2:20). with the STM, who left this planet and starts a new cycle, we are there to give a hand.

Thank you .. We have opened truly a new era with this T, but I wonder which president would be able to get into these, one of the systems and actually fly it. ...  
Get together and purchase these systems, because I love ?? all the time to see the KS to be the front runners, and then they bring the ethos of the work into the work.

(2:22).
